Retired after 36 years as president, Ogden-Weber Applied Technology College
5145 South Waco Drive, Ogden, Utah 84403

56 years

I've spent my lifetime working to strengthen our communities in Weber County by enhancing and creating educational opportunities, a primary economic driver that helps improve financial stability, our shared quality of life, our safety and, ultimately, our families' well-being. I hope to utilize this experience, along with my deep community roots, background in forging public-business partnerships, strong commitment to service and philanthropic efforts, as the District 10 Legislator in the Utah State House of Representatives. For 35 years, as president of the Ogden-Weber Applied Technology College, I collaborated with legislators in both parties to obtain student funding, acquire funds for capital projects and engage initiatives that benefited our institution, which in turn provided Weber County with a more qualified and dedicated workforce. Additionally, I helped facilitate numerous partnerships with business and industry to sustain economic development within our communities, helping to preserve public safety and allowing for responsible growth in crucial services, such as transportation and transit. I will represent you and your family to address these issues of education, crime, economic development, transportation and all matters that come before the Legislature. As your elected representative, I will prove that your interests are first and foremost in any action.
