

Roger Dixon for Highland City Council

Building on Highland's Firm Foundation: Honor the Past, Improve the Future

My work on Highland's Planning Commission, Town Center Development Committee, Library Board and Arts Council has shaped my vision for the City and prepared me to effectively carry out that vision. These opportunities have also given me a unique perspective that will serve me well on the City Council.

As a member of the Planning Commission, I have thoroughly studied each issue before the Commission, listened to citizen's views, consulted the city ordinances and frequently traveled around the city to improve my understanding of the locations and issues involved. I will apply this same dedication to the issues brought before the City Council.

I have over 40 years experience in developing, managing and evaluating international health programs and conferences and teaching planning and evaluation at the university level. My experience in humanitarian service missions supervising students abroad has given me the know-how to develop community solutions that will last.

Developing sustainable solutions requires the active involvement of community residents. I will reach out to Highland residents to tap their skills and volunteer spirit to address the challenges our community faces.
